SYSTEMATIC STUDY TO PREDICT THE ROLE OF BLOCKCHAIN APPLICATIONS IN SUPPLY CHAIN MANAGEMENT

BACKGROUND

Technical Field

[0001] The embodiments herein generally relate to a systematic study to predict the role of blockchain applications in supply chain management.

Description of the Related Art

[0002] Supply and demand commodity chains seek to provide high-quality products to end consumers through the management and coordination of services among various participants in the product chain. Some products need to be shipped or transported under certain conditions to maximize the freshness or quality of the product. These products may also require time-dependent and rapid delivery to the final destination or recipient where the end user purchases the product. Often, the product is transported over long distances and arrives at the retail center within the desired time, so it can be transported by land, sea, and/or air. In some examples, storing the product in the merchandising chain requires waiting for the next stage in the supply chain. In some commodity chains, the product is not monitored during storage, which can result in product damage or loss.

[0003] Whenever a clock or timer is impractical or too expensive to use, color-changing time indicators or indicating devices in the forms of labels, stickers, or badges are used. Indicators for monitoring the passage of a relative amount of time are referred herein to as time indicators or time indicating devices including but not limited to visual validation of time, safety sticker, self-timing retail stickers, biological industrial process monitoring, self-expiring stickers to prevent re-use, employee ID and security ID labels, visitors badges, self-

expiring parking tags, package and shipping labels, wrist bands, time indicating tickets for trains, buses, sports events, theaters, self-expiring passes for tours, emergency rooms, hospitals, museums, and other locations, event passes, security labels for screened luggage, purses, bags at airports to show the aircraft control people that the particular items were inspected, unmanned but video controlled entrances for visitors where the self-expiring visitor label issued electronically. It also includes limited-use items for consumers that once opened or in use should be used within a certain period, including but not limited to drinks, food items, and health, personal, and family care products. TI can also be used for monitoring the shelf life of perishables.

[0004] The traditional structure of the business supply chain, which viewed supply chain management as a chain of events, is evolving, in response to the ever-complicated logistics of modern trade, commerce, and communications, towards viewing supply chain management as a three-dimensional model. In other words, organizations no longer view supply networks as a linear relationship between raw materials and distributors. Rather, today's supply web resembles a three-dimensional construct, complete with a variety of suppliers, tiers, and intermediaries that serve to fill in for one another in the event of a disruption. Increasingly, how well a supply web creates and shares information not only defines how well the web holds together, how efficiently it operates, and how much value it adds but also determines the success or failure—as a group—of the manufacturing venture. Companies need to share supply metrics, timelines, demand, and capacity data to enable the supply network to develop a common and aligned set of objectives, which can protect it against commodity pressures, volatility, and individual failures. Sharing information can speed up supply chains while mitigating the inherent risks in doing so.

SUMMARY

[0005] In view of the foregoing, an embodiment herein provides a systematic study to predict the role of blockchain applications in supply chain management. A wide variety of medical supplies and other items are sterilized with materials and techniques, such as steam, dry heat, ethylene oxide, plasma, peracetic acid, formaldehyde, and high-energy radiation. Kitchenware, such as dishes, cutlery, and utensils used at home and restaurants are also sterilized in dishwashers with hot water and hot air usually around 90° C. It is essential to assure that these items are sterilized or meet the required specifications. Some sterilization-indicating devices, dosimeters, and monitors are proposed in the literature. They include biological and chemical indicating devices. The color-changing chemical indicating devices are inexpensive and widely used. A wide variety of foods especially canned foods, pharmaceuticals, and hospital and medical supplies are sterilized. These and other products, such as linens are sterilized to kill living organisms to an acceptable level. Direct testing for sterility is destructive and expensive and hence indirect testing methods, such as color-changing indicating devices are used.

[0006] A method of transporting goods in a supply chain management system including a supply chain, the database being accessible by one or more members of the supply chain over a network, the supply chain Providing a database including a predetermined state relating to one or more goods transported in a chain, a network communicating with the database, assigning at least one sensor to the goods, and using the sensors, monitoring at least one state of the product, communicating data representing the state of the at least one product to the database via the network, storing the communicated data in the database. Process system provides a process control system comprised of implementing the

process control to determine one or more operational parameters relating to at least one of the storage and transport of the goods in the supply chain and managing the status of the at least one product throughout the supply chain based on the data and the predetermined operational parameters, monitoring the supply chain assets using the process control and managing the asset via the network, monitoring the staff management in the supply chain using the process control, managing the staff management via the network, and based on the predetermined operational parameters, Supply chain It has a step of managing the items between the at least one storage and transport in emissions, and the step of maintaining the product within the predetermined state.

[0007] The performance information can include a plurality of manufactured item output projections over a specified time period, production facility sizes and/or locations, raw material, work-in-process, manufactured part and/or component and/or product inventory levels, order cycle times, days of supply in inventory, manufacturing resource type, availability, reliability, and/or productivity, unit operations, financial factors, number of on time shipments, number of late shipments, order mismatch count, service quality, repair cost per unit, inventory value, transaction documents associated with a material and/or part and/or component and/or product of one or more of the tier control tower, tier product assembler, tier part and/or component manufacturer, and tier material supplier, historic, current, and/or projected compliance with price, supply requirements, and/or other material terms, historic, current, and/or projected material and/or part and/or component and/or product output levels, and mean, median, average, mode, historic, and/or projected freight transportation times, delays, and/or requirements.

[0008] When going inspection consumer products' service condition, Cleaner can

estimate the quantity that often kind of consumer products that need to change. Generally, the articles for use such as the trolley can load onto the hand cleanser so that enough expectations will be changed, lavatory paper. Cleaner does not wish trolley overburden, because can cause difficulty to carry out. The usual Cleaner can be finished the consumer products that will change when once patrolling, therefore need to travel back to the apothecary required consumer products again taking. This significantly reduces the work efficiency of the Cleaner. But some existing technology are then by consumer products residue situation in electronic equipment monitoring toilet dispenser, these dividers have the supply line, cause becoming complicated when installing. Finally, these dividers need a powered battery, therefore must be regular monitoring and changing of the battery, adding many products needing monitoring and change on contrary, and adding the workload of cleaning workers simultaneously. The store status at the storage area internal sanitary accommodation consumables in the toilet of the present utility model monitoring described in this paper and consumer products supply-chain management system, and pass through the data of this system process, be supplied to managerial personnel or staff with the form reported. The staff or managerial personnel can obtain tank farm stock and the spending rate of consumables, occur the position of the toilet of shortage. The managerial personnel may determine which toilet needs to replenish, add how many, which toilet inspection route will comprise, amenities and cleaning supplies are whether had to occur the shortage stored, the need again ordering, and how long need until order next time.

[0009] These and other aspects of the embodiments herein will be better appreciated and understood when considered in conjunction with the following description and the accompanying drawings. It should be understood, however, that the following descriptions,

while indicating preferred embodiments and numerous specific details thereof, are given by way of illustration and not of limitation. Many changes and modifications may be made within the scope of the embodiments herein without departing from the spirit thereof, and the embodiments herein include all such modifications.

BRIEF DESCRIPTION OF THE DRAWINGS

[0010] The embodiments herein will be better understood from the following detailed description with reference to the drawings, in which:

[0011] Fig. 1 illustrates a systematic study to predict the role of blockchain applications in supply chain management according to certain embodiments herein; and

[0012] FIG. 2 illustrates a schematic cross-sectional and top view of an indicating device with a message printed over the activator layer and another message printed on the expiration indicator layer to create a new message according to certain embodiments herein.

DETAILED DESCRIPTION OF PREFERRED EMBODIMENTS

[0013] The embodiments herein and the various features and advantageous details thereof are explained more fully with reference to the non-limiting embodiments that are illustrated in the accompanying drawings and detailed in the following description. Descriptions of well-known components and processing techniques are omitted so as to not unnecessarily obscure the embodiments herein. The examples used herein are intended merely to facilitate an understanding of ways in which the embodiments herein may be practiced and to further enable those of skill in the art to practice the embodiments herein. Accordingly, the examples should not be construed as limiting the scope of the embodiments herein.

[0014] Fig. 1 illustrates a systematic study to predict the role of blockchain

applications in supply chain management according to certain embodiments herein. the staff management generates a reminder or an alarm regarding the re-authentication and training of each member based on information stored in the database. Member is trained and certified so that the product is handled at each stage of the supply chain according to predetermined operational parameters defined by the process control system. For the supplier, the staff can be authenticated to harvest or produce the product according to corresponding predetermined operational parameters. Concerning processing centers and distribution centers, staff can be authenticated to handle, process, and store products according to associated predetermined operational parameters. Transportation system staff should be trained and certified to control the loading and unloading of products from the vehicle and to maintain the products in the desired conditions desired. The training and authentication reminder to be transmitted to each member based on a predetermined schedule. The remainder can be transmitted to the member days before the expiration date of the authentication. Staff management also includes controls that suggest future training and re-authentication processes for members so that the authentication of each member can be effectively maintained. In some configurations, staff management may also have an automated time work system for calculating the time that a particular staff has handled or worked on the product. The staff management uses the information collected by the working time system to determine the labor cost result and calculate the cost related to the product.

[0015] The Performance information typically includes any information relative to supply chain performance, including, without limitation, one or more manufactured item output projections over a specified period, production facility sizes and/or locations, raw material, work-in-process, and/or manufactured parts, component, and/or product inventory

levels, order cycle times, days of supply in inventory, manufacturing resource type, availability, reliability, and/or productivity unit operations, financial factors number of on-time shipments, number of late shipments, order mismatch count, service quality, repair cost per unit, inventory value historic, current, and/or projected compliance with price, supply requirements, and/or other material terms, historic, current, and/or projected parts, components, and/or product output levels, mean, median and/or average, mode, historic, and/or projected freight transportation times, delays, or requirements, and the like. The performance information can be associated with a date, month, and/or season of the year. Metrics can be generated from the performance information, such as on-time shipment rate or percentage, late shipment rate or percentage, product rejection rate based on nonconformance with one or more restrictions, specifications, and/or requirements, parts, components, and/or product acceptance rate based on conformance with one or more restrictions, specifications, and/or requirements.

[0016] The database can be based on any data model, including the relational model, entity-relationship model, object model, object-relational model, XML, or another database model. The database can include, for each enterprise and/or organization in the supply chain, not only performance information but also transactional documents, name, geographical location, geopolitical location, part and/or component and/or product and/or material type and/or identity supplied by the enterprise and/or organization, current spot market and/or contractual sales price of the part and/or component and/or product and/or material type supplied by the enterprise and/or organization, respective performance metrics of the enterprise and/or organization, part and/or component and/or product and/or material supply and/or purchase commitment with another enterprise and/or organization in the supply chain,

specifications and requirements for part and/or component and/or product and/or material supplied and/or purchased by the enterprise and/or organization, part and/or component and/or product and/or material quantity and shipment dates and expected arrival dates at the next enterprise and/or organization in the supply chain, order cycle and/or turnaround times, shipment and/or order volume, total number of shipments, number of on time shipments, number of late shipments, order mismatch count, repair details, and each enterprise and/or organization is associated with one or more other enterprise and/or organizations in the supply chain to indicate a contractual or other supply relationship. Each enterprise and/or organization is normally assigned a role identifier, such as buyer, seller, supplier, manufacturer, material supplier, and the like, to describe the nature of the relationship of the enterprise and/or organization to each of the associated enterprise and/or organization in the supply chain.

[0017] FIG. 2 illustrates a schematic cross-sectional and top view of an indicating device with a message printed over the activator layer and another message printed on the expiration indicator layer to create a new message according to certain embodiments herein. The activator comprises any composition that can react with the indicator to cause an irreversible change in the chemical composition of the indicator. The activators comprise acids, bases, salts, chemical or biological agents,—chelates, water, and oxygen that readily attack metals and their alloys. Also contemplated within the precursors of the activators, that is, compositions that can be acted on by additional components of the indicating system to form the activators of the invention. a halide, oxide, nitrate, nitrite, phosphate, phosphite, phosphonate, sulfate, bisulfate, silicate, sulfite, sulfide, bisulfide, sulfonate, cyanate, cyanide, thiocyanate, acetylacetonate, carboxylate, percarboxylate,

carbonate or bicarbonate anion of a mono, di and trivalent cation of a metal or polyatomic anion of nitrogen, sulfur and phosphorous or mixture thereof, for example ammonium bromide, ammonium thiocyanate, calcium chloride, copper chloride, copper ammonia complex, lithium acetylacetonate, lithium chloride, lithium formate, phosphorous, phosphorous pentoxide, potassium acetate, potassium benzoate, potassium bromide, potassium chloride, potassium ferrocyanide, potassium ferricyanide, potassium formate, sodium acetate, sodium bicarbonate, sodium bromide, sodium carbonate, sodium cyanate, sodium diethyldithiocarbamate, sodium iodide, sodium metasilicate, sodium nitrate, sodium sulfite, sodium tetrafluoroborate, sodium tetraborate, sodium thiocyanate, sodium thiosulfate, tetraethylammonium bromide, zinc chloride or a mixture thereof.

[0018] The indicating system is used as in, for or on a safety sticker, self-timing retail sticker, biological industrial process monitor, self-expiring sticker to prevent re-use, security ID label, visitors badge, self-expiring parking tag, package and shipping label, wrist band, time indicating ticket for trains, buses, sports events, theaters, self-expiring pass for tours, emergency rooms, hospitals, museums, and other locations, race track pass, security label for screened luggage, purse, bag at airports to indicate that such items have been inspected, and at unmanned but video controlled entrances for visitors where a self-expiring visitor label is issued electronically. In addition, the indicating system can be used to indicate limited-time consumer use for items that have been opened or in use and should be used within a certain period, including but not limited to drinks, food items, health, personal, and family care products. The gimmick-type applications such as toys, gimmicks, messages, patterns, designs, gift cards, and greeting cards.

[0019] The serve to both incentivize and monetize media sharing in significantly new

ways that are not considered by conventional blockchain techniques. The present embodiments are further advantageous over conventional blockchain transactions in that the content itself can function as a currency transaction. Accordingly, the disclosed blockchain techniques are applied to enable, track, and report content transactions. Subscribers of media services can receive credits from a content provider for transactions. When such subscribers choose to view or buy content, the subscribers expend credits using a cipher transaction, which records on or more of the time, device ID, user ID, content ID, content license level, and other information related to the transaction and the respective electronic devices utilized to purchase or view the content. The transaction will then be reported by both the service provider and the user's device to a blockchain processing system that will add the cipher transaction to a blockchain ledger. Users can thus share content with other subscribers using a similar process. The rate of exchange of credits can vary when sharing according to the service provider's marketing goals. The service provider may grant new credits to users who share content. The value of the blockchain ledger in this CAC transaction environment is significant. The blockchain ledger can be used in the reconciliation of content agreements between content providers and service providers. The embodiments herein are therefore further useful for data analytics on viewing practices, distribution patterns, media interest levels, communities of interest, and similar analytics that apply to CAC transactions. In some embodiments, a particular subscriber's reputation and/or history can be a factor in granting media credits from a provider. Conversely, subscribers with a negative payment history can be restricted or prevented from receiving or sharing content, and users in communities of interest that have a lower payment probability can be similarly restricted, or receive fewer credits.

CLAIMS

I/We Claim:

- 1 1. A method of systematic study to predict the role of blockchain applications in supply
2 chain management, wherein the method comprises:
 - 3 a continuous layer of the metal or the metal alloy, with or without its respective oxide
4 particles of the metal or the metal alloy or with or without its respective oxide dispersed in a
5 binder permeable to the sterilant;
6 the controller communicating the signal and the acquired data to the database;
- 7 Wherein the controller comprises a step of monitoring the product throughout
8 the supply chain via the network;
 - 9 the disruptive event is not indicated in the collected performance information but
10 adversely impacts the performance of one or more supply chain components of the plurality
11 of supply chain components;
 - 12 include one for differentiating the residue situation of toilet products or the electricity
13 situation in short supply or electronic sensor configuration, and a radio communication device;
 - 14 alerting, by the observer node, the broker node of a change in the status of
15 the blockchain;
 - 16 the blockchain instance by the owner of the integrated blockchain domain name of
17 the blockchain instance in the integrated blockchain network from a trusted certification
18 authority.

Dated 07th day of February 2023

Signature

ABSTRACT

SYSTEMATIC STUDY TO PREDICT THE ROLE OF BLOCKCHAIN APPLICATIONS IN SUPPLY CHAIN MANAGEMENT

- 5 A continuous layer of the metal or the metal alloy, with or without its respective oxide particles of the metal or the metal alloy or with or without its respective oxide dispersed in a binder permeable to the sterilant. The controller communicates the signal and the acquired data to the database. Wherein the controller comprises a step of monitoring the product throughout the supply chain via the network. The disruptive event is not indicated in the collected
- 10 performance information but adversely impacts the performance of one or more supply chain components of the plurality of supply chain components. Include one for differentiating the residue situation of toilet products or the electricity situation in short supply or electronic sensor configuration, and a radio communication device. Alerting, by the observer node, the broker node of a change in the status of the blockchain.
- 15 The blockchain instance by the owner of the integrated blockchain domain name of the blockchain instance in the integrated blockchain network from a trusted certification authority.

INDUSTRY VISIT REPORT:

Name of The Organization : Pune Zillha Sahakari Doodh Utapadak Sangh Ltd (Katraj Dairy) Katraj, Pune

Address : Pune - Satara Rd, Katraj, Pune, Maharashtra 411046

Date : Wednesday, 25th Jan 2023

Time : 10:00 AM

Present : Dr. D.B. Bagul, Dr. Yashwant Lembhe, Prof. Akash Gawade, With
Students of MBA I & MBA II Year

Student Volunteers : Mr. Rushikesh Gaikwad, Mr. Sunil Rathod

About Visit:-

Katraj Dairy was incorporated in 1960 with an intention of providing an organized facility of milk collection for the village-level farmers situated in Pune district. Katraj Dairy started with milk collection of about 0.30 lakh (30,000) liters per day in the first year of operation and today has steadily grown to over 2.00 lakh (0.20 million) litres per day and has a financial turnover of over Rs.250 crores.

Katraj Dairy has achieved ISO 22000:2005 certification from Det Norskey Veritus. Katraj Dairy with its nine chilling plants and 131 BMC spread almost all over the district has an installed milk handling capacity of over 5 lakh liters per day. The main plant of Katraj is equipped with a modern Pasteurizer, homogenizer, Cream separator, Ghee processing, Milk Clarifier, Condense Milk Plant, Automatic packing of milk and milk products and other quality testing devices and well-equipped labs. Katraj Dairy has an installed processing capacity of 2 lakh (0.2 million) liters per day.

Katraj dairy manufactures / Distributes milk and milk products like Pasteurized / Homogenized-Cow milk, Toned milk, Double toned milk, Standardized Milk, Full cream milk, Cow & Buffalo Cream and Ghee, Shrikhand, Amrakhand, Malai Paneer, Dahi, Flavoured Milk, Lassi, JeeraTak, Table Butter, Milk Powder, Softy Ice cream, Pedha, Khoa, sterilized milk in 200 ml bottle and hard Ice-cream with different flavours in different pack sizes and Mango, Anjeer & Malai Burfi, Kalakand & KajuKatali.

All these products are available at Katraj-owned parlors at various locations in Pune City and through appointed distributors and retailing circuits. Very soon, Katraj plans to introduce an online ordering system for its distributors/retailers and consumers.

Katraj products have been in use in thousands of homes in Pune since 1961. Katraj Milk, Katraj Ghee, Katraj Shrikhand, Katraj Amrakhand, Katraj Lassi, Katraj Jeeratak (buttermilk), Katraj cream have made Katraj a leading food brand in Western Maharashtra. Today Katraj is a symbol of high-quality milk products sold at reasonable prices, the genesis of a vast co-operative network triumph of indigenous technology, the marketing of a farmers' organization.

1956 Reorganization states of Bombay, Madhya Pradesh and Hyderabad. However, in chronological sequence, the place of pride for providing public road transport services goes to the Hyderabad state.

First bus having been flagged off from the Pune to Ahmednagar in 1948.

It's a story that had a hesitant beginning, with many people then not giving the State Transport (ST) bus service more than a couple of years of existence. Standing today by this milestone of 71 years, its position of strength speaks for itself - 18,449-odd buses, 1,02,000 employees, about 67 lakh citizens utilizing the service daily. Tracing the history that saw this development, we go back to the 1920s, when various entrepreneurs started their operations in the public transport scenario. Till the Motor Vehicle Act came into being in 1939, there were no regulations monitoring their activities, and this resulted in arbitrary competition, unregulated fares. The implementation of the act rectified matters to an extent. The individual operators were asked to form a union on defined routes in a particular area. This also proved to be beneficial for travelers as some sort of schedule set in, with a time table, pick-up points, conductors, and fixed ticket prices. Thus continued the state of affairs till 1948, when then Bombay State Government, started its own state road transport service, called State Transport Bombay. And the first blue and silver-topped bus took off from Pune to Ahmednagar.

The driver and conductor used to wear khaki uniforms and peak caps. There were 10 makes of buses in use then - Chevrolet, Fort, Bedford, Seddon, Studebaker, Morris Commercial, Albion, Leyland, Commer and Fiat. In the early 1950s, two luxury coaches were also introduced with Morris Commercial Chassis. These were called Neelkamal and Giriyarohini and used to ply on the Pune-Mahabaleshwar route. They had two by two seats, curtains, interior decoration, a clock and green tinted glasses. In 1950, a Road Transport Corporation Act was passed by the Central Government and it delegated powers to states to form their individual road transport corporations with the Central Government contributing one-third of the capital. The Bombay State Road Transport Corporation

(BSRTC) thus came into being, later changing its name to MSRTC with the re-organization of the state.

The ST started with 30 Bedford buses having wooden bodies, coir seats and the fare charged on the Pune-Nagar route was nine paise. Having seen the ST undergo many changes, lists them off as- increasing the seating capacity from the original 30 to 45 to 54, introduction of all-steel bodies to replace wooden bodies to make them stronger and cushion seats for more comfort. Later, in 1960, aluminum bodies were introduced as steel corrodes, especially in coastal areas, and the color code also changed to red from the blue and silver. A partial night service was launched in 1956; the overnight service about a decade later and the semi-luxury class came into being during the Asian Games in 1982. Significantly, the ST does not only carry people but also takes care of the postal mail, distribution of medicines, newspapers and even tiffin's to children studying in the bigger towns. In

INDUSTRY VISIT REPORT:

Name of The Organization : Mangrow Agro Products PVT LTD

Address : Bebad ohol, Dam Road, Tal-Maval, Dist-Pune

Date : Saturday, 13th May 2023

Time : 10:00 AM TO 4:30 PM

Present : Dr. D.B. Bagul, Prof. Yashwant Lembhe, Prof. Akash Gawade,
Prof. Poorva Sane With Students of MBA I & MBA II Year

Student Volunteers : Mr. Yogiraj Zhanjane

About Visit:-

A complete report on industrial visit organized by Rjamata Jijau Shikshan Prasarak Mandal's Institute of Computer and Management Research for the students of MBA in order to get the practical knowledge about "advanced technology used in production and operations sectors as well as working of different departs of company"

We started travelling from the college campus at 08:30 am via our college bus. Totally 15 students along with 3 coordinators faculty were there in the journey.

INITIATIVES OF COMPANY

Their roots are deeply connected with agriculture and the people related to it. And that's the reason our initiatives are transforming the ways of farming and the way-of-life for the people we work with.

Contract Farming

Exclusive association with farmers for buying the produce grown on their farms, offering better-than market rates.

Sponsor Models

Under this model, they provide Manegrow seeds, compost, spawn and any required support to farmers. With this, once they start growing their own produce, they buy their yield, thus ensuring a regular income source and price security for them. The objective is to make them independent producers and suppliers within 2 years.

Model Farm

An in-house 5-acre model farm is utilised to host farmers for studying, learning and applying our methods, and further replicating in their own farms.

Employment

We've generated employment for 2000+ personnel at the farm and many more with contract farming initiatives. And through knowledge sharing, we also aim at enhancing their quality of life.

Knowledge Sharing

Training farmers regularly about evolving agricultural processes.

ATTAINING PERFECTION WITH A FLAWLESS FACILITY

Manegrow has an output capacity of a whopping 50 tonnes of Button mushrooms and 7 tonnes of veggies and fruits per day, making it Asia's biggest mushroom farm. It produces over 200 tonnes of Mushroom compost on a daily basis, and is planned to have 2000+ employees, with the provision to house over 200 of them.

All of it made possible with the most innovative ideas, advanced processes, state-of-the-art infrastructure and constantly evolving farming concepts.

INDUSTRIAL STUDY VISIT OF OUR MBA STUDENTS

Respected Sir,

I have the honor to request following for your kind consideration please.

We are one the premiere Institute located in the very vicinity of pious footsteps of Saint Gyaneshwar i.e. Alandi (Devachi) in Pune. We are imparting two years' full time Post Graduate Programme in Business Administration i.e. MBA, affiliated to University of Pune.

Management students are the "Future Managers". Our endeavor is to cast them as Industry demands too. In doing so, and enabling the students to deeply understand the Industrial/organizational set up imbued with Modern Management Practices and honing the management tactics, we intend an intensive interaction of students with your able and learned Management Team. We truly believe that their interaction would assist in inculcate leadership qualities in these students i.e. "Future Managers".

We are deeply sensed that you shall extend your support in this industrial social responsibility and to meet "Industry-Institution Interactive Session".

As our most of the students are from Technical / Engineering background hence visit to your industry will help them to understand practical functioning of your organization. May we now request your good self to grant the permission to our students to make an Industrial Study visit as per your convenient schedule and oblige.

We remain.

Thank you.

We have achieved a firm grasp in this domain thanks to an extensive experience of our promoter group who has over 40 years of experience in this domain. It is under their able guidance that we are able to establish ourselves as one of the leading names in this industry.

Pushpak products are rolled from 100% continuous cast billets. This nearly eliminates physical and chemical defects to produce quality rolled steel.

- In-depth industry experience
- Transparent and fair deals
- Faster order processing and placement
- Competitive rates
- Our products are used in diverse industries
- Timely delivery of goods
- Quality Assurance

This Industrial visit is very helpful in our future practical

INDUSTRIAL STUDY VISIT OF OUR MBA STUDENTS

Respected Sir,

I have the honour to request following for your kind consideration please.

We are one the premiere Institute located in the very vicinity of pious footsteps of Saint Gyaneshwar i.e. Alandi (Devachi) in Pune. We are imparting two years full time Post Graduate Programme in Business Administration i.e. MBA, affiliated to University of Pune.

Management students are the "Future Managers". Our endeavor is to cast them as Industry demands too. In doing so, and enabling the students to deeply understand the Industrial/organizational set up imbibed with Modern Management Practices and honing the management tactics, we intend an intensive interaction of students with your able and learned Management Team. We truly believe that their interaction would assist in inculcate leadership qualities in these students i.e. "Future Managers".

We are deeply sensed that you shall extend your support in this industrial social responsibility and to meet "Industry-Institution Interactive Session".

As our most of the students are from Technical / Engineering background hence visit to your industry will help them to understand practical functioning of your organization. May we now request your good self to grant the permission to our students to make an Industrial Study visit as per your convenient schedule and oblige.

We remain.

Thank you.

Yours truly,

About Visit:-

A complete report on industrial visit organized by Rajmata Jijau Shikshan Prasarak Mandal's Institute of Computer and Management Research for the students of MBA in order to get the practical knowledge about "advanced technology used in operations sectors as well as working of different departments of company"

We started travelling from the college campus at 08:30 am via our college bus. Totally 25 students along with 4 coordinators faculty were there in the journey.

About Parle G Biscuites

Parle-G is a brand of biscuits manufactured by Parle Products in India. A 2011 Nielsen survey reported that it is the best-selling brand of biscuits in the world. Parle products are rolled from 100% continuous cast billets. Parle Products was established as a confectionery maker in the Vile Parle suburb of Mumbai, in 1929. Parle Products began manufacturing biscuits in 1939. In 1947,

when India became independent, the company launched an ad campaign, showcasing its Gluco brand of biscuits as an Indian alternative to British-branded biscuits.

1947 advertisement

Parle-G biscuits were earlier called 'Parle Gluco' Biscuits until the 1980s. The "G" in the name Parle-G originally stood for "Glucose", though a later brand slogan also stated "G for Genius"

In 2013, Parle-G became India's first FMCG brand to cross the 5,000 crore mark in retail sales.

- In-depth industry experience
- Transparent and fair deals
- Faster order processing and placement
- Competitive rates

INDUSTRY VISIT REPORT:

Name of The Organization : Swiss Bakery
Address : Shop No. BG-45, Destination Center, Magarpatta City, Hadapsar,
Pune - 411 028
Date : Wednesday, 25th Jan 2023
Time : 02:00 PM
Present : Dr. D.B. Bagul, Dr. Yashwant Lembhe, Prof. Akash Gawade, With
Students of MBA I & MBA II Year
Student Volunteers : Mr. Rushikesh Gaikwad, Mr. Sunil Rathod

About Visit:-

Swiss Bakes delivered fresh cakes, pastries, baked breads and rolls straight to customer's door. Whether its cheese, creams, fresh fruits, spelt, rye, wholemeal, sweet or savoury we are sure you'll find our wide selection of mouth-watering cakes, pastries and breads delicious!

Swiss Bakes is a haven for self-indulgence in the most exquisite cakes, patisseries and bakers you will ever feast customer's eyes. All products of Swiss Bakes delicious hand-made cakes, gateaux and patisseries are a taste sensation using traditional recipes and authentic methods achieving a huge reputation.

At Swiss Bakery do corporate gifts for all customer's special occasions –whether it is Birthday, Farewell, Wedding and engagement ceremony, Anniversary, Diwali, Valentine's Day or any other occasion

Swiss Bakes speciality is quality and on top of that our amazing designers and fabulous cooks can produce many types of cake, in any design, in any shape

Customers will find a range of cakes that will be suitable for the occasion customers for celebrating. Many customers have appreciated the quality of our cakes by repeatedly coming back to us and recommending their friends and family.

It was an amazing experience with the owner of the Swiss bakes. He has struggled lot during initial phase of the business. He has implemented new strategy to attract the customers. Swiss bakes have given charging facilities for the customers that means customers can do their official work with laptop. And the main things which makes the Swiss Bakes unique than other is that no Questions will be ask to customers for how many times he has seating in the store without given orders.

Respected Sir,

I have the honour to request following for your kind consideration please.

We are one the premiere Institute located in the very vicinity of pious footsteps of Saint Gyaneshwar i.e. Alandi (Devachi) in Pune. We are imparting two years full time Post Graduate Programme in Business Administration i.e. MBA, affiliated to University of Pune.

Management students are the "Future Managers". Our endeavor is to cast them as Industry demands too. In doing so, and enabling the students to deeply understand the Industrial/organizational set up imbibed with Modern Management Practices and honing the management tactics, we intend an intensive interaction of students with your able and learned Management Team. We truly believe that their interaction would assist in inculcate leadership qualities in these students i.e. "Future Managers".

We are deeply sensed that you shall extend your support in this industrial social responsibility and to meet "Industry-Institution Interactive Session".

As our most of the students are from Technical / Engineering background hence visit to your industry will help them to understand practical functioning of your organization. May we now request your good self to grant the permission to our students to make an Industrial Study visit as per your convenient schedule and oblige.

We remain.

Thank you.

Yours truly,

Dr. D.B. Bagul

19th Jan 2023

INDUSTRY VISIT REPORT:

Name of The Organization : Autoline Industries Ltd

Address : S.No.313,314,320 to 323, Nanekarwadi, Chakan, Tal.Khed, Pune

Date : Thursday, 19th Jan 2023

Time : 01:00 PM TO 3:30 PM

Present : Dr. D.B.Bagul, Dr.. Yashwant Lembhe, Prof. Akash Gawade, With
Students of MBA I & MBA II Year

Student Volunteers : Mr. Rushikesh Gaikwad, Mr. Sunil Rathod

About Visit:-

Autoline Industries Ltd (AIL) (incorporated on December 16, 1996, as Autoline Stampings Private Ltd.) was initially set up in January 1995 as a partnership firm known as "Autoline Pressings" under Indian Partnership Act 1932. Our Company has grown into a medium sized engineering and auto ancillary Company, manufacturing sheet metal components, sub-assemblies and assemblies, Foot Control Modules, parking brakes, hinges, cab stay and cab tilt, exhaust systems, tubular structures, fabrications, etc. for large OEMs in the Automobile Industry. The turnover of 1.10 million in financial year 1995-96 and raised up to 8050 million in financial year 2012-13. We are a prominent Pune based leading auto components manufacturer and supplier to Original Equipment Manufacturers (OEMs) and Automobile companies with presence in the Domestic and international markets.

Autoline Industries Limited is listed company on BSE & NSE, with state of art more than 10 manufacturing facilities backed up with in-house design & engineering services and commercial tool room. Company is catering to almost all global OEM's supplying over 3000 products getting assembled into different passenger cars and commercial vehicles.

All the manufacturing facilities have been certified as ISO/TS 19649:2002 by TUV (Rh), Germany

Business Administration i.e. MBA, affiliated to University of Pune.

Rajmata Jijau Shikshan Prasarak Mandal is an educational trust established in year 2000 with an objective to cater to the academic needs of the society in general and Pimpri - Chinchwad and Bhosari in particular. Founder trustee and president of the trust is Hon. Mr. Vilasrao Lande, who is also the MLA of Bhosari Constituency of Maharashtra State

Vision

"To serve the needs of the society by imparting knowledge and developing skills and attitudes to inculcate in them values of life."

Mission

To inculcate among the students, the moral, spiritual and social values to grow as useful citizens and fully developed individuals to enable them to obtain gainful employment or self-employment.

And after that she introduced Mr. Ravi Baviskar Sir with students. Mr. Ravi Baviskar has taken students activities to aware the students about self-confidence, self-motive and difference between the Job Giver and Job Seeker.
